

ANANYA KRISHNAN

Machine Learning Engineer

Contact: ananya.k@email.com | +91-9988776655

GitHub: github.com/ananyak | LinkedIn: linkedin.com/in/ananyakrishnan

PROFESSIONAL SUMMARY

ML Engineer with 3 years of hands-on experience in developing deep learning models and deploying ML solutions. Proficient in Python, TensorFlow, and cloud technologies with strong foundation in computer science.

WORK EXPERIENCE

Machine Learning Engineer | AI Innovations Pvt Ltd, Bangalore

March 2022 - Present (2 years)

- Developed deep learning models for image classification using CNNs and transfer learning
- Deployed ML models on AWS using Docker and EC2 instances
- Created data preprocessing pipelines handling 1M+ records daily
- Implemented MLOps practices including model versioning and monitoring
- Collaborated with data science team to improve model accuracy by 15%
- Built REST APIs for model inference using Flask and FastAPI

Junior ML Engineer | DataSystems Inc, Hyderabad

July 2021 - February 2022 (8 months)

- Worked on NLP projects including text classification and named entity recognition
- Used PyTorch and Hugging Face transformers for model development
- Performed data analysis and visualization using pandas and matplotlib
- Participated in model evaluation and A/B testing

EDUCATION

Bachelor of Engineering in Computer Science

National Institute of Technology, Trichy

2017 - 2021 | CGPA: 8.5/10

Relevant Coursework: Machine Learning, Deep Learning, Data Structures, Algorithms,
Database Systems, Statistics

TECHNICAL SKILLS

Programming Languages: Python (Advanced), SQL, C++

ML Frameworks: TensorFlow, PyTorch, Scikit-learn, Keras

Cloud Technologies: AWS (EC2, S3, Lambda), Docker

Databases: PostgreSQL, MySQL, MongoDB

Libraries: NumPy, Pandas, Matplotlib, Seaborn, OpenCV

Version Control: Git, GitHub

Other: REST APIs, Flask, FastAPI, Jupyter Notebooks

PROJECTS

Deep Learning Based Image Classifier

- Built CNN model using TensorFlow achieving 91% accuracy on CIFAR-10 dataset
- Implemented data augmentation and transfer learning with ResNet50
- Deployed model using Flask API on AWS EC2

Sentiment Analysis System

- Developed LSTM-based model for Twitter sentiment analysis
- Preprocessed and cleaned 100K+ tweets using NLTK and spaCy
- Achieved 87% accuracy on test set

Customer Segmentation using Clustering

- Applied K-means and hierarchical clustering on customer purchase data
- Generated business insights for marketing team

- Visualized segments using PCA and t-SNE

CERTIFICATIONS

- TensorFlow Developer Certificate - Google (2023)
- AWS Machine Learning Foundations - AWS (2022)
- Deep Learning Specialization - Coursera (2021)
- Python for Data Science - IBM (2020)

TECHNICAL WRITING

- Published 5+ technical blogs on Medium about ML topics
- Active contributor on Stack Overflow (500+ reputation)

ACHIEVEMENTS

- 2nd Prize in Inter-NIT ML Hackathon 2020
- CodeChef 3-star rating
- Solved 300+ problems on LeetCode
