

Senior Machine Learning Engineer

About the Role:

We are seeking an experienced Machine Learning Engineer to join our AI team. You will work on cutting-edge ML projects, building and deploying production-ready models at scale.

Key Responsibilities:

- Design and implement machine learning models for production systems
- Collaborate with data scientists and engineers to deploy ML solutions
- Optimize model performance and scalability
- Maintain ML infrastructure and pipelines
- Research and implement state-of-the-art ML techniques

Required Qualifications:

- Bachelor's or Master's degree in Computer Science, AI/ML, or related field
- 3+ years of experience in machine learning engineering
- Strong programming skills in Python
- Experience with ML frameworks (TensorFlow, PyTorch, Scikit-learn)
- Solid understanding of ML algorithms and deep learning
- Experience with cloud platforms (AWS, GCP, or Azure)
- Knowledge of Docker and Kubernetes for ML deployment

Required Skills:

- Python
- Machine Learning
- Deep Learning
- TensorFlow or PyTorch
- SQL and databases
- REST APIs
- Git version control
- Docker

- Cloud platforms (AWS/GCP/Azure)
- Data preprocessing and feature engineering

Preferred Skills:

- MLOps experience
- Experience with Large Language Models
- Computer Vision or NLP expertise
- Distributed computing
- A/B testing

Experience Level: Senior (3-5 years)

Domain: Artificial Intelligence / Machine Learning

Location: Bangalore, India
